

SOLAR PANEL UPDATE

Dear McMillan Library Supporter,

As you may know, we issued a statement earlier this year regarding the solar array on the library roof, advising that it was the decision of the Library Board of Trustees to remove the array rather than paying a substantial sum to buy the array and retain it. Recently, however, the Board was contacted by Viking Electric, the owner and installer of the array, with a request that the Board accept and retain the solar array as a donation from Viking. After thoughtful consideration, the Board has decided to accept the donation. The solar array will remain, and we are pleased to continue our commitment to green energy.

Thank you,
McMillan Memorial Library Board of Trustees
